DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a transgenic plant transformed with a HI0103.1 gene encoding SEQ ID NO: 2 and method of transforming a plant with said sequence.

Group II, claim(s) 9-11, drawn to a method of generating a plant having a high oil phenotype by identifying a plant having an HI0103.1 allele that results in increased oil.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I requires an isolated SEQ ID NO: 2 for transformation of a plant. However, the invention of Group II does not require SEQ ID NO: 2 and does not require a transformed plant. Instead Group II is drawn to screening of plants for a high oil phenotype.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
